SOHO RESOURCES CORP.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

May 31, 2012

(Unaudited - Expressed in Canadian dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Soho Resources Corp. (the "Company") was incorporated on April 11, 1986 under the laws of British Columbia, Canada. The Company's head office address is Suite 250, 1090 West Georgia Street, Vancouver, BC, V6E 3V7, Canada. The registered and records office address is Suite 700, 595 Burrard Street, Vancouver, BC, Canada, V7X 1S8. The Company is a reporting issuer in the provinces of British Columbia and Alberta, Canada, and trades on the TSX Venture Exchange (TSX-V) under the symbol "SOH".

The Company is engaged in the identification, acquisition, exploration and, if warranted, development of exploration and evaluation assets consisting of mineral resource projects in Mexico ("mineral properties"). In conducting operations in Mexico, the Company is subject to considerations and risks not typically associated with companies operating in Canada. These include risks such as the political, economic and legal environments in an emerging market. Among other things, the Company's results may be adversely affected by changes in political and social conditions in Mexico, and by changes in governmental policies with respect to mining laws and regulations, anti-inflationary measures, currency conversion and remittance abroad, and rates and methods of taxation.

The Company is considered to be in the exploration stage as it has not placed any of its mineral properties into production. The Company has not generated any production revenue since inception and has never paid any dividends and is unlikely to pay dividends or generate earnings in the immediate or foreseeable future. The Company has not yet determined whether its properties contain mineral reserves that are economically recoverable. The recoverability of the amounts spent for exploration and evaluation assets is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposition of the properties. The Company will periodically have to raise additional funds to continue operations and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

These condensed consolidated interim financial statements are prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business in the foreseeable future. The Company believes it does not have sufficient cash on hand to finance exploration activities and operations through the next twelve months without additional financing. The Company's ability to continue on a going concern basis depends on its ability to successfully raise additional financing for the substantial expenditures required to achieve planned principal operations.

These condensed consolidated interim financial statements do not include any adjustments relating to the recoverability and classification of recorded assets and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

SOHO RESOURCES CORP.**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

May 31, 2012

(Unaudited - Expressed in Canadian dollars)

2. BASIS OF PRESENTATION

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standards 34, Interim Financial Reporting ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). The accounting policies and methods of computation applied by the Company in these condensed consolidated interim financial statements are the same as those applied in the Company's annual consolidated financial statements as at and for the year ended February 29, 2012. The condensed consolidated interim financial statements do not include all of the information required for full annual financial statements. These condensed consolidated interim financial statements should be read in conjunction with the Company's February 29, 2012 annual consolidated financial statements.

These condensed consolidated interim financial statements were approved by the Board of Directors on July 30, 2012.

These condensed consolidated interim financial statements includes the accounts of Soho Resources Corp. ("Soho") and its following listed subsidiaries:

Subsidiary name	Incorporation jurisdiction	Ownership
Samarkand de Mexico S.A. de C.V. ("Samarkand")	Mexico	100%
Sierra Soleada S.A. de C.V. ("Sierra")	Mexico	100%
Sacramento de la Plata S.A. de C.V. ("Sacramento")	Mexico	99%
531607 BC Ltd	BC, Canada	100%

3. RECEIVABLES

The receivable amounts relate to both Canadian and Mexican refundable value added taxes.

4. EXPLORATION AND EVALUATION ASSETS

Title to exploration and evaluation assets (or "mineral properties") involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties are in good standing.

Tahuehueto Project

In 1997, pursuant to a share purchase agreement through Samarkand, the Company acquired 90% of the issued and outstanding capital stock of Sacramento. In March 2007 the Company converted a portion of inter-company debt between Samarkand and Sacramento into equity, thereby increasing its ownership in Sacramento from 90% to 99%. Sacramento holds a 100% interest in the Tahuehueto mineral property, located in Durango State, Mexico. A portion of the property is subject to a 1.6% net smelter return royalty ("NSR").

Pursuant to the share purchase agreement, the Company is obligated to make final payments of US\$200,000 to the vendors of the Sacramento shares.

(Unaudited - Expressed in Canadian dollars)

4. EXPLORATION AND EVALUATION ASSETS (continued)

In 2006, the Company entered into an agreement for surface access rights to certain areas of the Tahuehueto project, expiring in May 2016. Under the terms of this agreement the Company must pay an annual fee escalating at 5% per annum. The fee due for the 2013 fiscal year of US\$26,801 (2012 - US\$25,525) was paid in July 2012.

Jocuixtita Project

During the year ended February 28, 2010 the Company acquired mineral properties by staking and entered into two option agreements to explore and acquire a 100% interest in mineral properties located in Jocuixtita, Sinaloa, Mexico. The option agreements were amended on January 31, 2011. Pursuant to the amended option agreements, the Company must make option payments totaling US\$1,010,000 over a period of six years, of which a maximum of US\$372,660 may be paid by issuing common shares to the vendors. A portion of the optioned property is subject to a 2% NSR. The Company may acquire 1.75% of the 2% NSR by making a cash payment of US\$612,500 to the vendors.

Due to an internal dispute amongst local residents the Company enforced a Force Majeure clause in the option agreements and suspended the January 31, 2012 payment due of US\$150,000. During the year ended February 28, 2011, the Company paid the vendors US\$75,000 and issued 480,483 common shares valued at \$49,730 (US\$50,000). The Company has elected to suspend exploration activities at the Jocuixtita Project until the dispute amongst local residents is resolved.

In May 2011, the Company entered into an agreement for surface access rights to certain areas of the Jocuixtita project, expiring in May 2041. Under the terms of this agreement the Company must pay an annual fee based on the area occupied, adjusted annually for inflation. The fee due for the 2012 fiscal year of MXN\$174,493 (Cdn\$14,030) was paid in June 2011. Fees for the 2013 fiscal year have not yet been determined, nor paid, as the Company is not carrying on exploration activities at this time.

The reclamation and remediation provision represents the present value of reclamation and remediation costs relating to exploration and evaluation activities that have occurred to date.

9. SHARE CAPITAL**Authorized:**

Unlimited common shares without par value

100,000,000 Class A preference shares with a par value of \$1 per share

100,000,000 Class B preference shares with a par value of \$5 per share

Fiscal 2013 Transactions

No shares were issued during the period ended May 31, 2012.

Subsequent to May 31, 2012, the Company completed a non-brokered private placement of 12,500,000 units of the Company. Each unit is priced at \$0.06 per unit for total gross proceeds of \$750,000. Each unit is comprised of one common share of the Company and one half of a two year transferable share purchase warrant. Each whole share purchase warrant entitles the holder thereof to purchase one additional common share of the Company at \$0.10 within two years of its date of issuance. At February 29, 2012, the Company had received subscription payments of \$350,000 relating to this private placement financing and during the period ended May 31, 2012 the Company received the remaining \$400,000 proceeds to completed this private placement.

In connection with this financing; the Company paid finders' fees by issuing 600,000 units valued at \$36,000, with the same terms as the private placement units; and incurred share issue costs of \$4,680.

Fiscal 2012 Transactions

No shares were issued during the period ended May 31, 2011.

10. SHARE-BASED PAYMENTS RESERVE

A 2011 Stock Option Plan (the "Plan") was approved by the shareholders on November 3, 2011, at the Company's annual general meeting. Under the Plan, the Company is authorized to grant options to executive officers, directors, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common stock of the Company, on a rolling basis. Options may be granted at an exercise price of no less than a 25% discount of the market price on the date of the grant, or such higher price as determined by the board of directors. Options can be granted for a maximum term of 5 years. Vesting is not required but may be set on an individual basis as determined by the board of directors.

Share-based payments

During the period ended May 31, 2012, the Company granted 450,000 (May 31, 2011 – 50,000) stock options. The options vested either at 100%; or at 25% upon the date of grant, and then at a rate of 25% every 3 months thereafter, until fully vested. The options have a term of 5 years.

For the period ended May 31, 2012, the total fair value of options granted using the Black-Scholes option pricing model was \$19,553 (May 31, 2011 – \$5,050). A total of \$19,553 (May 31, 2011 – \$2,806) was charged to operations; all offset to share-based payments reserve. The weighted average fair value of the options granted during the period was \$0.04 (May 31, 2011 – \$0.10) per option.

During the period ended May 31, 2012, 375,000 (May 31, 2011 – 200,000) options previously issued as share-based payments with a fair value of \$173,972 (May 31, 2011 – \$89,185) expired without being exercised. The previously recorded historical fair value of these options was transferred from reserve to deficit.

The following weighted average assumptions were used for the Black-Scholes valuation of stock options granted during the period:

	May 31, 2012	May 31, 2011
Risk-free interest rate	1.60%	2.78%
Expected life of options/warrants	5 Years	5 Years
Annualized volatility	129.47%	117.98%

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**Fair values**

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

The fair value of cash is measured at Level 1 of the fair value hierarchy. The carrying value of receivables, trade and other payables, advances, and loans approximate their fair value because of the short-term nature of these instruments.

Financial instrument risk exposure and risk management

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company considers the fluctuations of financial markets and seeks to minimize potential adverse effects on financial performance.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management process.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

Financial instrument risk exposure and risk management (continued)

The fair value of the Company's receivables, accounts payable and accrued liabilities, and due to related party approximate their carrying values. The Company's other financial instrument, being cash, is measured at fair value using Level 1 inputs.

The Company is exposed to varying degrees to a variety of financial instrument related risks:

Credit risk

Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligation. The Company's exposure to credit risk includes cash and receivables. The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions. The Company's receivables consist primarily of tax receivables due from federal government agencies. The maximum exposure to credit risk is equal to the fair value or carrying value of the financial assets.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. The Company has trade and other payables, advances, and loans.

Interest rate risk

The Company has cash balances. The Company's current policy is to invest excess cash in investment-grade short-term demand deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit rating of its banks. The Company is exposed to interest rate risk. The Company's bank account earns interest income at variable rates.

Foreign currency risk

The Company is exposed to foreign currency risk on currency fluctuations related to monetary items with a settlement currency other than Canadian dollars. The Company operates in foreign jurisdictions which use both the United States Dollar ("US\$") and the Mexican Peso ("MXN\$") as the main settlement currencies. The Company does not use derivative instruments to reduce upward and downward risk associated with foreign currency fluctuations. The effect of a 1% change in foreign exchange rates would be approximately \$3,400.

Commodity price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold and other precious and base metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

15. CAPITAL RISK MANAGEMENT

The Company manages common shares, stock options, and share purchase warrants as capital. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its exploration and evaluation assets and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets, or adjust the amount of cash on hand.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

In order to maximize ongoing exploration efforts, the Company does not pay out dividends. The Company's investment policy is to keep its cash treasury on deposit in an interest bearing Canadian chartered bank account. Cash consist of cash on hand and balances with banks. The Company considers all highly liquid instruments with maturity of three months or less at the time of issuance to be cash equivalents and the fair value approximates carrying value

There have been no changes to the Company's approach to capital management during the period ended May 31, 2012. The Company is not subject to externally imposed capital requirements.

16. COMMITMENTS

The Company has the following commitments at May 31, 2012:

- a) The Company rents its office premises under an operating lease until June 2012. Subsequent to the period end, this lease was renewed until June 2014. The operating lease commitment, including rent plus estimated common area costs, is approximately \$100,000 per annum.
- b) The Company rents office and warehouse space in Mexico under operating leases until May 2013 at a total monthly rent of MXN\$24,000 (Cdn\$2,000).

17. SUBSEQUENT EVENTS

Subsequent to May 31, 2011 the Company received a cash advance of \$30,000 from a director. This cash advance is unsecured, non interest-bearing and has no fixed terms of repayment.
